

# WHEEL GUIDE A1

**Alapont wheel guides** assist the driver during coupling by helping the HGV to position itself straight at the loading and unloading point. So it thereby avoids damage to the HGV, the ramp and the dock shelter, ensuring efficient airtightness.

The different formatting options are:

- STRAIGHT wheel guides with or without intermediate support
- OPEN wheel guides with or without intermediate support.

The finishing options are:

- Hot galvanised
- Baked paint, yellow.
